

List of Contents

NUMBERS 1-2

PROCEEDINGS OF THE 21ST INTERNATIONAL CONFERENCE ON COMPUTERS AND INDUSTRIAL ENGINEERING

Sabah U. Randhawa

1 Editor's Note

TECHNOLOGY MANAGEMENT

**Neslihan Alp, Birol Alp and
Yildirim Omurtag**

**3 The influence of decision makers for new technology
acquisition**

**Neslihan Alp, Birol Alp and
Yildirim Omurtag**

**7 Technology acquisition and utilization model
(TAUM)**

**Wieslaw Switek and
Tadeusz Majewski**

**11 Dynamic modeling and optimization for technology
management**

INFORMATION SYSTEMS

**W. Hernandez and
J. M. Rivera**

**15 A production information system, an application in
the pharmaceutical industry**

**Dinesh Dhamija,
David A. Koonce and
Robert P. Judd**

**19 Development of a unified data meta-model for CAD-
CAPP-MRP-NC verification integration**

**Miguel-Angel Oros-
Hernández**

**23 Symbolic optimization in an object-oriented database
using constraints**

**David A. Koonce,
Cheng-Hung Fang
and Shi-Chi Tsai**

**27 A data mining tool for learning from manufacturing
systems**

Anwar-ul Islam

**31 Derivation of selection criteria of CIM database using
IDEF₀**

**Cheickna Sylla and
Michael R. Bartolacci**

**35 A DSS methodology for the evaluation of ATM
technologies**

OPTIMIZATION

**Mitsuo Gen, Kenichi Ida,
Jaeuk Lee and
Jongryul Kim**

**39 Fuzzy nonlinear goal programming using genetic
algorithm**

**Nazario D. Ramírez-Beltrán
and Karina Aguilar-
Ruggiero**

**43 Application of an heuristic procedure to solve mixed-
integer programming problems**

Contents

- | | | |
|-------------------------------------------------------------|----|------------------------------------------------------------------------------------------------|
| Raymond G. Taylor | 47 | A general form for the capital projects sequencing problem |
| Alberto Garcia-Diaz and
Ahmet Kuyumcu | 51 | A cutting-plane procedure for maximizing revenues in yield management |
| Mauricio Osorio and
Bharat Jayaraman | 55 | Specification and computation of optimization problems |
| Nasser S. Fard | 59 | Determination of minimal cut sets of a complex fault tree |
| J. Xue and K. K. Lai | 63 | A study on cargo forwarding decisions |
| Miguel Vélez-Reyes and
George C. Verghese | 67 | Parameter estimation using decomposed algorithms with fast convergence rates |
| Takao Yokota,
Takeaki Taguchi and
Mitsuo Gen | 71 | A solution method for optimal weight design problem of herical spring using genetic algorithms |

SIMULATION

- | | | |
|----------------------------------------------------------------------|-----|---------------------------------------------------------------------------------------------------------------|
| Sabah Randhawa and
Chun-Ho Kuo | 77 | Generating knowledge and decision expertise using simulation |
| Elsayed A. Orady,
T. A. Osman and
Clark P. Bailo | 83 | Capability study of robotics and manufacturing cell simulation software |
| Elsayed A. Orady,
T. A. Osman and
Clark P. Bailo | 87 | Virtual reality software for robotics and manufacturing cell simulation |
| Jianxin Jiao, Maode Ma and
Mitchell M. Tseng | 91 | Simulation on a fault tolerant multiprocessor system |
| Carlos J. González,
Merbil González and
Nilda M. Ríos | 97 | Improving the quality of service in an emergency room using simulation-animation and total quality management |
| G. Allen Pugh | 101 | Fuzzy allocation of manufacturing resources |
| M. S. Eid, C. Moghrabi and
H. K. Eldin | 105 | A simulation approach to evaluating quality/cost decision scenarios |
| O. Starostenko,
A. Sanchez Aguilar
and S. Lobato | 109 | Simulation facilities for RISC processors data flow and performance optimizations |

QUALITY CONTROL AND RELIABILITY

- | | | |
|------------------------------------------------|-----|-------------------------------------------------------|
| Ariel Sepúlveda and
Joel A. Nachlas | 113 | A simulation approach to multivariate quality control |
|------------------------------------------------|-----|-------------------------------------------------------|

Contents

Prapaaisri Sudasna-na-Ayudhya and Edward D. McDowell	117	A comparison of two approaches to automating robust design
Jiangbin Yang and Viliam Makis	121	On the performance of classical control charts applied to process residuals
Felipe Llaugel and Silverio Confesor	125	Computer-aided statistical quality control learning
Kuo-Hsiung Wang and B. D. Sivazlian	129	Life cycle cost analysis for availability system with parallel components
Azim Houshyar and Bahador Ghahramani	133	A practical reliability and maintainability data collection and processing software
Evelyn Morales, Radamés Aguayo and Juan C. Villa	137	Manufacturing tracking system at Hewlett Packard Puerto Rico
Noel Artiles-León and Javier Rodríguez-Reyes	141	Optimization of Carborundum's gas igniter furnacing process using experimental design
Noel Artiles-León and Francisco Mella-Cabrera	145	Improvement of igniters' quality characteristics using experimental design
Denis Ridley	149	Antithetic lognormal/normal random variables

QUALITY MANAGEMENT

Rosalva Martínez and J. Francisco Rodríguez	153	Quality services model oriented to customers
Thomas J. Crowe, Krishnakant Rathi and Joseph D. Rolfes	157	Selecting business process reengineering projects strategically
Aysar Philip Sussan and William C. Johnson	161	The impact of market/quality orientation on business performance
A. C. J. van Rensburg	167	An object-oriented architecture for business transformation
José R. Deliz	171	Lessons learned from Baldrige winners
J. K. Banerjee	175	The gap management
Sharon D. Ramsey and Celestine A. Ntuen	179	SATORC: a system analysis tool for reengineering complex systems

HUMAN FACTORS ENGINEERING

M. L. Resnick and A. Zanotti	185	Using ergonomics to target productivity improvements
-------------------------------------	-----	------------------------------------------------------

Contents

Samantha Wright	189	Validating a predictive model for computer icon development
Dara Strickland and Celestine Ntuen	193	The effects of personality on supervisory control tasks
Maranda E. McBride and Celestine A. Ntuen	197	The effects of multimodal display aids on human performance
Celestine A. Ntuen and Jianhong Gong	201	A computer simulation of human perception of color
Max A. Dixon, Jose A. Alvarez, Jose Rodriguez and Julie A. Jacko	205	The effect of speed reducing peripherals on motorists' behavior at pedestrian crossings
Kimberly Coley, Samantha Wright, Eui Park and Celestine Ntuen	209	Optimizing the usability of automated teller machines for older adults
Zulma R. Toro Ramos and Marco A. Henrich Saavedra	213	Anthropometric table for the Puerto Rican industrial population
Lesia L. Crumpton and Edward L. Harden	217	Using virtual reality at a tool to enhance classroom instruction

CELLULAR MANUFACTURING

Gürsel A. Süer and Ivan Sánchez-Bera	221	Common cell size determination and cell loading in labor-intensive manufacturing cells
Angel A. Cedeño and Gürsel A. Süer	225	The use of a similarity coefficient-based method to perform clustering analysis to a large set of data with dissimilar parts
Mitchell M. Tseng and Jianxin Jiao	229	A module identification approach to the electrical design of electronic products by clustering analysis of the design matrix
Rasaratnam Logendran and Vimalin Puvanunt	235	Duplication of machines and subcontracting of parts in the presence of alternative cell locations
Yannick Marcoux, Jocelyn Drolet and Georges Abdulnour	239	Studying the performance of a dynamic cellular manufacturing system
Adelina Castillo, Hamid Seifoddini and Jeffrey Abell	243	The development of a cellular manufacturing system for automotive parts

PRODUCTION SCHEDULING

O. Holthaus	249	Design of efficient job shop scheduling rules
--------------------	-----	-----------------------------------------------

Contents

- | | | |
|----------------------------------------------------------------------------|------------|---------------------------------------------------------------------------------------------------------------------------------------|
| C. H. Dagli and K. Schierholt | 253 | Evaluating the performance of the genetic neuro scheduler using constant as well as changing cross-over and mutation rates |
| Alex J. Ruiz-Torres,
E. Emory Enscore and
Russell R. Barton | 257 | Simulated annealing heuristics for the average flow-time and the number of tardy jobs bi-criteria identical parallel machine problem |
| Ebru Demirkol and
Reha Uzsoy | 261 | Performance of decomposition methods for complex workshops under multiple criteria |
| W. Hernandez, J. M. Rivera
and I. Y. Alfonso | 265 | An alert mechanism for the release lateness |
| Ceyda Oğuz and Fikret Ercan | 269 | Scheduling multiprocessor tasks in a two-stage flow-shop environment |
| Grisselle Centeno and
Robert L. Armacost | 273 | Parallel machine scheduling with release time and machine eligibility restrictions |
| Gürsel A. Süer,
Francisco Pico and
Aidsa Santiago | 277 | Identical machine scheduling to minimize the number of tardy jobs when lot-splitting is allowed |
| C. Rajendran and H. Ziegler | 281 | A heuristic for scheduling to minimize the sum of weighted flowtime of jobs in a flowshop with sequence-dependent setup times of jobs |
| D. L. Santos and
Anthony Heath | 285 | An application of multiprocessor scheduling methods in the production of digital holographic images |

MISCELLANEOUS IE APPLICATIONS

- | | | |
|------------------------------------------------------------------------------------------------|------------|----------------------------------------------------------------------------|
| José Luis Pérez | 289 | TOC for world class global supply chain management |
| Merbil González-Martínez,
José A. Borges,
José Navarro,
Néstor J. Rodríguez | 295 | An Automatic Resource Scheduling System (ARSS) |
| A. S. Anagun | 299 | Selecting inventory models using an expert system |
| Keytack H. Oh | 303 | Expert Line Balancing System (ELBS) |
| Masud Mansuri | 307 | Cycle-time computation, and dedicated storage assignment, for AS/R systems |
| B. S. Boardman,
E. M. Malstrom,
D. P. Butler and M. H. Cole | 311 | Computer assisted routing of intermodal shipments |
| Jorge L. Perez-Lafont | 315 | Installation of a T.P.M. program in a Caribbean plant |

Contents

- | | | |
|-----------------------------------------------------------|-----|---------------------------------------------------------------------------------------------|
| Mitchell M. Tseng and
Jianxin Jiao | 319 | Case-based evolutionary design for mass customization |
| Surendra M. Gupta and
Jacqueline A. Isaacs | 325 | Value analysis of disposal strategies for automobiles |
| Asker Gungor and
Surendra M. Gupta | 329 | An evaluation methodology for disassembly processes |
| José A. Cruz-Cruz | 333 | Professional staff coordination: support for staffing at professional service organizations |
| Nazario D. Ramirez-Beltran
and Jaime A. Montes | 337 | Neural networks for on-line parameter change detections in time series models |

COMPUTER-INTEGRATED MANUFACTURING

- | | | |
|------------------------------------------------------------------------------------------------|-----|---------------------------------------------------------------------------------------------|
| Charles M. Parks,
David A. Koonce,
Robert P. Judd and
Michael Johnson | 341 | An integrated manufacturing systems design environment |
| Nanua Singh, S. Ding,
R. Jagirdar and E. A. Basil | 345 | A knowledge engineering framework for rapid design |
| S. Motavalli, S. H. Cheraghi
and Rafie Shamsaasef | 349 | Feature-based modeling; an object oriented approach |
| Parveen S. Goel and
Nanua Singh | 353 | A modeling approach for integrating durability engineering and robustness in product design |
| M. Rico, O. Yuschak,
M. L. Taverna,
J. C. Ramos, M. R. Galli
and O. Chiotti | 357 | Decision support systems generator for industrial companies |

MANUFACTURING—ELECTRONICS

- | | | |
|----------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------|
| Bernard Cyr, Serge Lambert,
Georges Abdul-Nour and
René Rochette | 361 | Manufacturing flexibility: SMT factors study |
| Enrique Guerra,
Alfonso Manriquez,
Daniel Schwartz and
J. Rene Villalobos | 365 | Three dimensional automated visual inspection of surface mounted devices |
| Serge Lambert, Bernard Cyr,
Georges Abdul-Nour and
Jocelyn Drolet | 369 | Comparison study of scheduling rules and set-up policies for a SMT production line |
| David Enke and Cihan Dagli | 373 | Automated misplaced component inspection for printed circuit boards |

Contents

- | | | |
|---------------------------------------------------------------------------------------------------------|-----|---------------------------------------------------------------------------------------------------|
| Y. Y. Su, K. Srihari and
C. R. Emerson | 377 | A profile identification system for surface mount printed circuit board assembly |
| D. L. Santos,
Rajkumar B. Raj,
Molly Lane,
David Sissenstein and
Michael Testani | 381 | Defect reduction in PCB contract manufacturing operations |
| Lisa Rielly, K. Srihari and
Jude Dilella | 385 | A systematic evaluation of adhesive deposition for mixed technology PCB assembly |
| Héctor I. Espada Colón and
David R. González-Barreto | 389 | Component registration diagnosis for printed circuit boards using process-oriented basis elements |
| Octavian Nicolio | 393 | Numerical computations on the m-resistor trimming problem |

MANUFACTURING—MECHANICAL

- | | | |
|-----------------------------------------------|-----|------------------------------------------------------------------------------------------------------------|
| C. Acosta, W. Switek
and E. Garcia | 397 | Dynamic modeling in turning machining |
| S. J. Lou and J. C. Chen | 401 | In-process surface recognition of a CNC milling machine using the fuzzy nets method |
| W. Hernandez and V. J. Leon | 405 | An overview of the operations analysis of a two-head flexible assembly machine with interference avoidance |
| Yuan-Shin Lee and
Dhaval Daftari | 409 | Process planning and machining of generic virtual pockets by feature-composition approach |

MANUFACTURING CONTROLS

- | | | |
|--------------------------------------------------------------------------------------|-----|--------------------------------------------------------------------------------|
| G. Sun, C. H. Dagli
and A. Thammano | 413 | Dynamic neuro-fuzzy control of the nonlinear process |
| Nazario D. Ramirez-Beltran | 417 | Transfer function models to control a chemical process |
| Agustín Rullán | 421 | Programmable logic controllers versus personal computers for process control |
| Ricardo Moncada V.,
Carlos Pavone,
José Ferrer S. and
Manuel Vera | 425 | A multi-purpose real-time man-machine interface for control systems laboratory |

IMAGE PROCESSING

- | | | |
|-------------------------------------|-----|--------------------------------------------|
| J. B. Bosch and E. M. Ehlers | 429 | Remote sensing of characters on 3D objects |
|-------------------------------------|-----|--------------------------------------------|

Contents

Wendolin Bosques, Ricardo Rodríguez, Angélica Rondón and Ramón Vásquez	433	A spatial data retrieval and image processing expert system for the World Wide Web
Hamed Parsiani and Ricardo Garcia	437	Analysis of iterated block matching fractals for image compression
Hamed Parsiani and William Navas	441	Analysis of iterated function system fractals for image compression
V. Manian and R. Vásquez	445	Feature analysis for scaled and rotated texture segmentation
R. Singh, R. Singh and R. Vásquez	449	ML parameter estimation and minimum distance classifier for texture analysis using wavelet transform

NUMBERS 3-4

SELECTED PAPERS FROM THE PROCEEDINGS OF 1996 ICC&IC ARTIFICIAL INTELLIGENCE/NEURAL NETWORKS

Sungzoon Cho, Min Jang, Sungcheol Yoon, Yongjoong Cho and Hyungsuk Cho	453	A hybrid neural-network/mathematical prediction model for tandem cold mill
Inho Jang and Jongtae Rhee	457	Generalized machine cell formation considering material flow and plant layout using modified self-organizing feature maps
Steven H. Kim and Churl Min Lee	461	Nonlinear prediction of manufacturing systems through explicit and implicit data mining
Yinzhen Li, Kenichi Ida, Mitsuo Gen and Reiko Kobuchi	465	Neural network approach for multicriteria solid transportation problem
Inkap R. Song, Taeyong Yang and Jacob Jen-Gwo Chen	469	Enhanced exchange heuristic based resource constrained scheduler using ARTMAP
Abdolhamid Torki, Samerkae Somhon and Takao Enkawa	473	A competitive neural network algorithm for solving vehicle routing problem
Yasuhiro Tsujimura, Mitsuo Gen and Syunsuke Ishizaki	477	Optimal routing in multiple I/O data network using neural network with perturbed energy function

Contents

CAD/CAM/CAPP

- | | | |
|-------------------------------------------------------------------|------------|------------------------------------------------------------------------------------------|
| Y. H. Chen and C. T. Ng | 481 | Integrated reverse engineering and rapid prototyping |
| S. K. Cheng and K. P. Rao | 485 | Quick and precise clustering of arbitrarily shaped flat patterns based on stringy effect |
| Ajay Joneja | 489 | Geometric reasoning for optimizing backward growing-based feature recognition |
| Jaekoo Joo, Hyunbo Cho and Wonsoo Yun | 493 | Efficient feature-based process planning for sculptured pocket machining |
| N. K. Kim, Y. Kim and S.-H. Kang | 497 | Subdivision methods of converting STEP into VRML on Web |
| Yong Se Kim, Youngjin Kim, Frederic Pariente and Eric Wang | 501 | Geometric reasoning for mill-turn machining process planning |
| Y. M. Kyoung, K. K. Cho and C. S. Jun | 505 | Optimal tool selection for pocket machining in process planning |
| M. A. Younis and M. A. Abdel Wahab | 509 | A CAPP expert system for rotational components |

ERGONOMICS

- | | | |
|--------------------------------------------------------------------------|------------|-------------------------------------------------------------------------------------------------------------------------|
| Yves Beauchamp, Marc Thomas, Jean Arteau and Denis Marchand | 513 | Psychophysical measurements as an effective way of evaluating climbability of wood treated utility poles |
| DooWon Cha and Peom Park | 517 | User required information modality and structure of in-vehicle navigation system focused on the urban commuter |
| Min K. Chung and Kyungim Choi | 521 | Ergonomic analysis of musculoskeletal discomforts among conversational VDT operators |
| Dohyung Kee and Sang Ho Kim | 525 | Analytic generation of workspace using the robot kinematics |
| Byoungju Kim, Sung H. Han, Keewon Nam, Jaeho Park and Seungah Han | 529 | Presenting map information on a global positioning system |
| Gene C. H. Lee, Younghak Yoo and Sherrie Jones | 533 | Investigation of driving performance, vection, postural sway, and simulator sickness in a fixed-based driving simulator |

FLEXIBLE MANUFACTURING SYSTEMS

- | | | |
|----------------------------------------------------------------|------------|-----------------------------------------------------------------------|
| Pyung-Hoi Koo, J. M. A. Tanchoco and Joseph J. Talavage | 537 | Tool requirements in manufacturing systems under dynamic tool sharing |
|----------------------------------------------------------------|------------|-----------------------------------------------------------------------|

- | | | |
|---------------------------------------------------------------------------------------------------|-----|---------------------------------------------------------------------------------------------------|
| Dong-Ho Lee,
Seung-Kil Lim,
Geun-Cheol Lee,
Hong-Bae Jun and
Yeong-Dae Kim | 541 | Multi-period part selection and loading problems in flexible manufacturing systems |
| Rasaratnam Logendran
and Chang Seong Ko | 545 | Manufacturing cell formation in the presence of flexible cell locations and material transporters |
| Hosub Shin, Jeongho Park,
Choonghwa Lee and
Jinwoo Park | 549 | A decision support model for the initial design of FMS |

FUZZY SET THEORY AND APPLICATIONS

- | | | |
|---------------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------|
| Mitsuo Gen,
Yasuhiro Tsujimura
and Dazhong Zheng | 553 | An application of fuzzy set theory to inventory control models |
| Jung Bok Jo,
Yasuhiro Tsujimura,
Mitsuo Gen,
Genji Yamazaki and
Jae Uk Lee | 557 | Performance of multiclass BCMP model for computer system based on fuzzy set theory |
| Y. J. Ju, C. E. Kim
and J. C. Shim | 561 | Genetic-based fuzzy models: interest rate forecasting problem |
| Shin'ya Nagasawa | 565 | Application of fuzzy theory to value engineering |
| HanSuk Pan and
WonYoung Yun | 569 | Fault tree analysis with fuzzy gates |

GENETIC ALGORITHMS

- | | | |
|----------------------------------------------------------------------|-----|-------------------------------------------------------------------------------------------------------|
| N. W. Cho, N. K. Kim,
Y. Kim and S.-H. Kang | 573 | An evolutionary method for general surface-surface intersection problems |
| Dijin Gong, Mitsuo Gen,
Genji Yamazaki and
Weixuan Xu | 577 | Hybrid evolutionary method for capacitated location-allocation problem |
| B. M. Kim, Y. B. Kim
and C. H. Oh | 581 | A study on the convergence of genetic algorithms |
| Yinzhen Li, Kenichi Ida
and Mitsuo Gen | 589 | Improved genetic algorithm for solving multiobjective solid transportation problem with fuzzy numbers |
| W. Y. Liang and
Peter O'Grady | 593 | Genetic algorithms for design for assembly: the remote constrained genetic algorithm |
| Takeaki Taguchi, Kenichi Ida
and Mitsuo Gen | 597 | Method for solving nonlinear goal programming with interval coefficients using genetic algorithm |

IE APPLICATIONS

- | | | |
|------------------------------------------------------------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------------------------|
| Akihide Hiura,
Toshiya Kuroda,
Nobuhiro Inuzuka,
Ken-ichi Itoh,
Masashi Yamada,
Hirohisa Seki and
Hidenori Itoh | 601 | Cooperative behavior of various agents in dynamic environment |
| Keun-Chae Jeong and
Yeong-Dae Kim | 605 | Algorithms for determining capacities of individual buffers in assembly/disassembly systems |
| Shigeo Kato | 609 | Simulation of a gas-liquid phase-change micro-actuator |
| Cheol-Shin Kwon and
Keun-Tae Cho | 613 | An estimation model for completion times considering the time interval between interdependent R&D events |
| M. L. Manjunath,
V. M. Rao Tummala
and Kevin Cox | 617 | A decision support system model in estimating budgets for standard figure tools at Mattel Toys |
| H. S. Mok, H. J. Kim
and K. S. Moon | 621 | Disassemblability of mechanical parts in automobile for recycling |
| Tadashi Takemae,
Masahiro Ito and
Seiya Murase | 625 | Parallel processing circuit of line image using Neuristor |
| Mitchell M. Tseng
and Jianxin Jiao | 629 | A variant approach to product definition by recognizing functional requirement patterns |
| Ichida Yozi | 635 | Computer networks and interfirm relationships in the automobile industry: a comparative study of Japan and Korea |

INFORMATION SYSTEMS

- | | | |
|-------------------------------------------------------------------------------------|-----|-----------------------------------------------------------------------------------------------------------------|
| Toshinori Chikara and
Takenori Takahashi | 639 | Research of measuring the customer satisfaction for information systems |
| N. C. Do, S. M. Bae
and I. J. Choi | 643 | Constraint maintenance in engineering design system: an active object-oriented approach |
| Gilsang Jang and
Heeseok Lee | 649 | File and workload allocation design for distributed database on a two-level local multi-access computer network |
| Hee-Ryn Jang,
Toyokazu Nose,
Sennosuke Kuriyama
and Yasuo Adachi | 653 | Cost management system based on EUC concept |

Contents

- | | |
|-----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Dong-Ha Lee,
Su-Woong Kim,
Gabrielle Methou and
Jeon-Young Lee | 657 Search for the blind: a schema independent query method using concept hierarchy and keywords |
|-----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|

- | | |
|-----------------------------------------|------------------------------------------------------------|
| De-Li Yang and
Xiaotong Wang | 661 An approach to unify model definition and manipulation |
|-----------------------------------------|------------------------------------------------------------|

MATERIAL HANDLING

- | | |
|---------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| Ying-Chin Ho and
Colin L. Moodie | 665 Locating I/O points of flexible manufacturing cells with the consideration of within-cell and inter-cell flow distance |
|---------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|

- | | |
|------------------------------------------|--------------------------------------------------------------------------------------------------------------------|
| Kap Hwan Kim and
Jae Yeon Kim | 669 Estimating mean response time and positioning idle vehicles of automated guided vehicle systems in loop layout |
|------------------------------------------|--------------------------------------------------------------------------------------------------------------------|

- | | |
|------------------------------------------|----------------------------------------------------------------------------------------------------|
| Ki Young Kim and
Kap Hwan Kim | 673 A routing algorithm for a single transfer crane to load export containers onto a containership |
|------------------------------------------|----------------------------------------------------------------------------------------------------|

- | | |
|-------------------------------------------------|---------------------------------------------------------------------------------|
| Norio Yamaguchi and
Kazuhiro Shimoda | 677 An operation analysis of movable rack type AS/RS by use of system simulator |
|-------------------------------------------------|---------------------------------------------------------------------------------|

OPTIMIZATION/MATHEMATICAL PROGRAMMING

- | | |
|--------------------------------------------------------|------------------------------------------------------|
| Geun-Sik Jo, Ken McAloon
and Carol Tretkoff | 681 Modern modeling of a classic multiperiod problem |
|--------------------------------------------------------|------------------------------------------------------|

- | | |
|-------------------------------------------|-----------------------------------------------------------------------|
| Daeki Kim and
Cynthia Barnhart | 685 Multimodal express shipment service design: models and algorithms |
|-------------------------------------------|-----------------------------------------------------------------------|

- | | |
|------------------------------------------|-----------------------------------------------------------------------|
| Si-Hwa Kim and
Kyung-Keun Lee | 689 An optimization-based decision support system for ship scheduling |
|------------------------------------------|-----------------------------------------------------------------------|

- | | |
|-------------------------------------------------------|----------------------------------------------------------|
| Ojeong Kwon, Kyungsik Lee
and Sungsoo Park | 693 Targeting and scheduling problem for field artillery |
|-------------------------------------------------------|----------------------------------------------------------|

- | | |
|-----------------------|------------------------------------------------------------------------------------------------|
| Chiun-Ming Liu | 697 Network dual steepest-edge methods for solving capacitated multicommodity network problems |
|-----------------------|------------------------------------------------------------------------------------------------|

PRODUCTION PLANNING AND INVENTORY MANAGEMENT

- | | |
|------------------------|-----------------------------------------------------------------------|
| Heung-Suk Hwang | 701 A study on an inventory model for items with Weibull ameliorating |
|------------------------|-----------------------------------------------------------------------|

- | | |
|---------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| Hiroshi Katayama,
Jun Nakazato,
Seiji Ishikawa and
Masayoshi Ishii | 705 Some advanced semiconductor production-inventory management systems and their performances |
|---------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|

- | | |
|------------------------------------------|---------------------------------------------------|
| Kyung K. Lee and
Young S. Kim | 709 Price-based buffer sizing in assembly systems |
|------------------------------------------|---------------------------------------------------|

Contents

- | | | |
|---------------------------------------------------------------------------|-----|--------------------------------------------------------------------------------------|
| Youngsu Lee,
Sooyoung Kim,
Seunghye Yea and
Bokang Kim | 713 | Production planning in semiconductor wafer fab considering variable cycle times |
| S. W. Shinn | 717 | Determining optimal retail price and lot size under day-terms supplier credit |
| Gürsel A. Süer | 721 | Minimizing the number of tardy jobs in multi-period cell loading problems |
| Ken Takeda and
Mitsuru Kuroda | 725 | Analysis of multi-stage production/inventory system with an acceptable response time |
| Yeong-joon Yoo,
Won-seok Kim and
Jong-tae Rhee | 729 | Efficient inventory management in multi-echelon distribution systems |

RELIABILITY AND QUALITY MANAGEMENT

- | | | |
|--------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------------------------|
| O. O. Atienza, L. C. Tang
and B. W. Ang | 733 | ARL properties of a sample autocorrelation chart |
| Sanghoon Lee and
Sungwoon Choi | 737 | Adaptive process monitoring using scale CUSUM for serially correlated processes |
| So Young Sohn | 741 | Bayesian dynamic forecasting for attribute reliability |
| Shigeru Yanagi,
Kazunari Hasegawa
and Tetsushi Yuge | 745 | An approximation to the steady state probabilities of a multi-echelon repair model for a series system |
| Masaaki Yonezawa and
Shoya Okuda | 749 | Structural reliability assessment based on directional vector approximation method |
| Wang-Jin Yoo and
Kyung-Hee Jung | 753 | Mission reliability of an automatic control system integrated with distributed intelligent built-in-test systems |

SCHEDULING

- | | | |
|-----------------------------------------------------------------|-----|-------------------------------------------------------------------------------------------------|
| Jun-Geol Baek,
Jong-Kwan Baek and
Sung-Shick Kim | 757 | A batch scheduling scheme for the workcenter that supplies parts to a mixed-model assembly line |
| Runwei Cheng and
Mitsuo Gen | 761 | Parallel machine scheduling problems using memetic algorithms |
| K. Choi, S. Kim, H. Lee,
I. Kwon | 765 | An operation scheme for make-to-order job-shop production systems |
| Wonjoon Choi and
Hyunoh Shin | 769 | A real-time sequence control system for the level production of the automobile assembly line |

Contents

- | | | |
|------------------------------------------------------------------|------------|----------------------------------------------------------------------------------------------------|
| Hark Hwang and Ji Ung Sun | 773 | Production sequencing problem with reentrant work flows and sequence dependent setup times |
| B. J. Jeong | 777 | Evaluation of assembly sequences using generalized flexible assembly systems scheduling problem |
| Hanil Jeong, Sangbok Woo, Sukho Kang and Jinwoo Park | 781 | A batch splitting heuristic for dynamic job shop scheduling problem |
| Kap Hwan Kim, Jun Yeob Song and Ki Hong Wang | 785 | A negotiation based scheduling for items with flexible process plans |
| Joon-Mook Lim | 789 | A genetic algorithm for a single hoist scheduling in the printed-circuit-board electroplating line |
| Moon-Won Park and Yeong-Dae Kim | 793 | Search heuristics for a parallel machine scheduling problem with ready times and due dates |
| Sungyeol Yu, Jinhyeon Sohn, Sungsoo Park and Byung Jun Oh | 797 | Efficient operation of a multi-functional surface mounting device |

STOCHASTIC MODELING AND SIMULATION

- | | | |
|-----------------------------------------------------------|------------|-------------------------------------------------------------------------|
| X. N. Hu, L. C. Tang and H. L. Ong | 801 | A $M/D^X/1$ vacation queue model for a signalized intersection |
| Young-Hae Lee, Kyou-Hyung Kyung and Chang-Sik Jung | 805 | On-line determination of steady state in simulation outputs |
| Koichi Nakade and Katsuhisa Ohno | 809 | Stochastic analysis of a U-shaped production line with multiple workers |
| Yasuhide Shinohara, Tadashi Dohi and Shunji Osaki | 813 | Comparisons of optimal release policies for software systems |
| Loon C. Tang and Ek-Peng Chew | 817 | Order picking systems: batching and storage assignment strategies |

TELECOMMUNICATION

- | | | |
|--------------------------------------------------------|------------|---------------------------------------------------------------------------------------|
